PRODUCT INFORMATION

WSD FENBENDAZOLE 100

Oral Anthelmintic for Cattle and Horses

Product Description
WSD FENBENDAZOLE 100 is a broad spectrum treatment for roundworm and tapeworm parasites of cattle and horses.

Type of Preparation
WSD FENBENDAZOLE 100 is a suspension for oral use as a drench containing 100g/L fenbendazole- a benzimidazole (BZ).

Indications
Cattle:
Mature and immature stages of the following worms. Barber’s pole worm (Haemonchus spp), hair worm or small hair worm (Trichostrongylus spp), small brown stomach worm (Ostertagia ostertagi including hypobiotic larvae), small intestinal worm (Cooperia), whipworm (Trichuris), lungworm (Dictyocaulus viviparus), Capillaria spp, hookworm (Bunostomum sp). Fenbendazole aids in the control of tapeworms (Moniezia spp).

Dairy Cattle:
Suitable for cattle producing milk for human consumption (see withholding period information)

Horses:
Mature and immature large strongyles (Strongylus spp), small strongyles (Cyanthostrongylidae), ascarids (Parascaris equorum), pinworms (Oxyuris equi), Strongyloides westeri.

Dosage
Always refer to the label. BZ’s generally have low toxicity but to avoid residue problems, it is good practice to separate into different weight classes if there is a large variation in age and weight.

Cattle: Dose at the rate of 3.75ml per 50kg body weight.
Horses: Dose at the rate of 1ml per 10kg body weight

Advice On Use
• WSD FENBENDAZOLE 100 is a reliable broad-spectrum oral drench for cattle and horses of all ages.
• WSD FENBENDAZOLE 100 is safe for use in pregnant mares and stud males.
• It is effective in treating severe scouring due to Ostertagia- type II ostertagiosis in adult cattle.
• It is often best administered to adult cattle with a drenching hook.
• The repeated use of any drench is likely to result in the emergence of resistance among cattle parasites. WSD provides a range of treatments for cattle parasites and consideration should be given to utilizing more than one treatment group in a worm control program.
Active constituent:
100 g/L Fenbendazole

For the control of benzimidazole sensitive roundworms and lungworms in cattle, and large and small strongyles ascarids and pinworms in horses

CAUTION
KEEP OUT OF REACH OF CHILDREN
READ SAFETY DIRECTIONS BEFORE OPENING OR USING
FOR ANIMAL TREATMENT ONLY

WSD Fenbendazole 100

ORAL ANTHELMINTIC FOR CATTLE AND HORSES
Active constituent:
100 g/L Fenbendazole

For the control of benzimidazole sensitive roundworms and lungworms in cattle, and large and small strongyles ascarids and pinworms in horses

10 L
**DIRECTIONS FOR USE:** Shake well before use.

**DOSE RATES:**

Dose rates should be based on the heaviest animal by liveweight in each group (bulls, cows, steers and calves; horses) and these should be weighed with scales or weighband. Do not underdose. A representative sample of animals should be weighed before treatment either with scales or weighband. Where there is a large variation in size within the group, dose rate should be based on the label directions for each weight range. Drafting into two or more lines may be appropriate, to avoid excessive overdosing.

**WSD FENBENDAZOLE 100 ORAL ANTHELMINTIC FOR CATTLE AND HORSES**

Contains Fenbendazole, a member of the benzimidazole family of drenches. It is effective in cattle and horses against benzimidazole sensitive strains of the following internal parasites:

**HORSES**
- Capillaria spp
- Oxyuris spp
- Parascaris equorum

**CATTLE**
- Haemonchus placei
- Oesophagostomum radiatum
- Trichostrongylus spp
- Nematodirus spp
- Trichuris spp
- Dictyocaulus viviparous
- Cooperia spp
- Ostertagia spp
- Oesophagostomum radiatum
- Trichostrongylus spp
- Oxyuris spp
- Oxyuris equi

**DOSAGE: HORSES:**
- 1mL/10kg bodyweight (10mg Fenbendazole per kg bodyweight)

**DOSAGE: CATTLE:**
- Over 750kg: 3.75mL per 50kg bodyweight
- 500kg–750kg: 4.85mL
- 400kg–500kg: 5.85mL
- 300kg–400kg: 6.85mL
- 200kg–300kg: 7.85mL
- 100kg–200kg: 8.85mL
- 50kg–100kg: 9.85mL

**WHITOLDING PERIOD:**

- MEAT (Cattle): DO NOT USE less than fourteen (14) days before slaughter for human consumption.
- MEAT (Horses): DO NOT USE less than twenty eight (28) days before slaughter for human consumption.

**TRADE ADVICE:** EXPORT SLAUGHTER INTERVAL (ESI):

DO NOT USE less than fourteen (14) days before slaughter for export. The ESI on this label was correct at the time of label approval. Before using this product, confirm the current ESI from the manufacturer on www.wsdagribusiness.com or the APVMA website www.apvma.gov.au/residues/ESI.shtml.

**SAFETY DIRECTIONS:**

 Harmful if absorbed by skin contact or swallowed. Avoid contact with skin. Wash hands after use.

**FIRST AID:**

If poisoning occurs, contact a doctor or Poisons Information Centre, Australia 13 11 26.

**MATERIAL SAFETY DATA SHEET (MSDS):** Additional information is listed in the Material Safety Data Sheet, which can be obtained from the supplier.

**PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND THE ENVIRONMENT:** Dangerous to fish. Do not contaminate streams, rivers and waterways with this product or used containers.

**STORAGE:**

Store below 30°C (room temperature) in the closed, original container in a dry, well-ventilated area, and protect from light.

**DISPOSAL:**

Do not dispose of undiluted chemicals on-site. Break, crush, puncture or bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots. Empty containers and product should not be burnt.

**CONDITIONS OF SALE:**

All WSD Agribusiness products are of a high quality, being subjected to rigid quality control. The manufacturer, however, is unable to control the product’s subsequent handling or use by the consumer. This product is sold on the express condition that neither the manufacturer nor the distributor is under any liability for any loss or damage that may arise through such handling or use. If these conditions are unacceptable the container should be returned unopened for credit.
